Election/Restrictions

A telephone call was made to Benito J. Rohm on 12/23/02 to request an oral election to the below restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim1-15, drawn to a method of transacting sales over a computerized network, classified in class 705, subclass 26.
- II. Claim 16-19, drawn to a method of including a prospective purchaser in a pool in a computerized network transaction system, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a prospective purchaser in a pool. See MPEP § 806.05(d).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew s Gart whose telephone number is 703-305-5355. The examiner can normally be reached on 8:30AM to 5:00PM m-f.
